REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

-5 JAN 1911

Kept at The Parsonage Littlebredy

in the County of Dorset 3

by C. E. R. Romilly

RAIN GAUGE
Pattern
Diameter of top 7 in.
Height of top above Ground ft. 7 in.
" " " Sea Level 372 ft.

Time of Observation 9. a.m.

Nearest Railway Station
Name Dorchester
Distance 7m. Direction N.E.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

BRITISH RAINFALL.
3 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at New Barn, Abbotsbury

in the County of Dorset

by James C P White

Rain Gauge:
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 111 ft.

Time of Observation 8 AM

Nearest Railway Station: Name Abbotsbury
Distance 2½ miles Direction N.W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

4 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at New Barn, Abbotsbury

in the County of Dorset

3

by James C. P. White

Rain Gauge:
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 111 ft.

Time of Observation 8. A.M.

Nearest Railway Station:
Name Abbotsbury G.W.R
Distance 2½ m Direction N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Total fall for the Year, ... *in.* *No. of Days with a fall of* ·01 *in. or more,* 168

INSTRUCTIONS.

The rainfall, recorded if possible at 9h. a.m., should be entered to the day previous to that on which it is measured. If the daily record is unavoidably interrupted the two or three days' accumulation should be bracketed. Days without rain should be marked with a dash (–). When the fall is less than ·01in. the water should be returned to the receiver and a cross (×) entered in the register. The capacity of the receiver should be at least 6 inches. Notes on Thunderstorms, Halos, and other Meteorological Phenomena of like nature, are welcome, and may be inserted on the blank page opposite.

Observers are requested to send their returns as soon as possible after the end of the year to the Honorary Editor of the Proceedings, the Rev. W. Miles Barnes, Monkton Rectory, Dorchester.

A. A. Leonard.

FORM A2.
BRITISH RAINFALL.

-6 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Beaminster Vicarage
in the County of Dorset 3
by Rev. A. A. Leonard

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 216 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Crewkerne / Bridport
Distance 6 m Direction N. / S.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2. BRITISH RAINFALL.

6 JAN

REGISTER OF RAINFALL IN 1910

Kept at Longtharns. Blandford

in the County of Dorset 3

by Samuel Smart.

RAIN GAUGE
Pattern Round funnel with [illegible]
Diameter of top 5 in. (to go in [illegible])
Height of top above Ground ... ft. 12 in.
„ „ „ Sea Level ... ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Blandford
Distance 6½ mls Direction S E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
22 MAR 1910

Kept at Ranston

in the County of Dorset

by Sir Rand

in.

round 1 ft. 6 in.

a Level ft.

a.m.

me Shillingstone

stance 3 miles Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

RAIN GAUGE
Pattern Snowdon
Diameter of top 6 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 110 ft.

Time of Observation 10 am.

Nearest Railway Station
Name Bradpole Rd.
Distance 1/2 m. Direction N.E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A.B. BRITISH RAINFALL

3 JAN 1911

REGISTER OF RAINFALL IN 1910.

Kept at Blackdown House

in the County of Dorset 2

by C. E. M. Pinney.

RAIN GAUGE Pattern Snowdon

Diameter of top 5 in.

Height of top above Ground ft. 9 in.

" " " Sea Level 515 ft.

Time of Observation 9 A.M.

Nearest Railway Station Name Chard Junction.

Distance 4½ m. Direction North West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
3 JAN 1911

Kept at Buckhorn Weston Rect

in the County of Dorset 4

by Revd W. Hughes-D'Aeth

Rain Gauge:
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 285 ft.

Time of Observation 9 a.m

Nearest Railway Station:
Name Templecombe
Distance 3½ Direction SW

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. Distance 3½ mls Direction W.N.W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

4 MAR 1911

Kept, at Montevidio Chickerell

in the County of Dorset 3

by Mrs N. M. Richardson

Rain Gauge
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 100 ft.

Time of Observation 9.30

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

FORM A2.
BRITISH RAINFALL.
7 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Wollaston House, Dorchester

in the County of Dorset 3

by Capt John E. Acland

Rain Gauge
Pattern Casella
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
„ „ „ Sea Level 200 ft.

Time of Observation 9.0. A.M.

Nearest Railway Station L.S.W.R
Name Dorchester
Distance ⅓ M. Direction South S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Distance 1¼ miles Direction E.

FORM A2.
BRITISH RAINFALL.
19 JAN 1910

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

INSTRUCTIONS.

The rainfall, recorded if possible at 9h. a.m., should be entered to the day *previous* to that on which it is measured. If the daily record is unavoidably interrupted, the two or three days' accumulation should be bracketed. Days without rain should be marked with a dash — . When the fall is less than ·01in. the water should be thrown away. Notes on Thunderstorms, Halos, and other Meteorological Phenomena of like nature are welcome, and may be inserted on the blank page opposite.

Observers are requested to send their returns as soon as possible after the end of the year to H. Stilwell, Esq., Steepleton Manor, Dorchester.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

13 JAN 1911

Kept at Horton Vicarage

in the County of Dorset 4

by The Rev George Wellington

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. – in.
„ „ „ Sea Level 133 ft.

Time of Observation 9 o'c Am

Nearest Railway Station
Name Verwood
Distance 3¾ Direction E

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL 10

FORM A2.
BRITISH RAINFALL.

4 JAN 1911

Kept at Holme Cleave.
in the County of Lyme Regis. Dorset. 3
by Mrs L. Cave.

RAIN GAUGE: Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 250 ft.
Time of Observation 9 a.m.
Nearest Railway Station: Name Lyme Regis
Distance 0.4 m Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
4 MAR 1911

Kept at Wynford House

in the County of Dorset 3

by Lord Wynford

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 6 in.
" " " Sea Level 410 ft.

Time of Observation

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2. BRITISH RAINFALL.

7 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Milton Abbey Gardens

in the County of Dorsetshire 3

by C. H. Perkins

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 9½ in.
" " " Sea Level 333 ft.

Time of Observation 9 a.m

Nearest Railway Station
Name Blandford
Distance 7 Direction N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Diameter of top 5 in.
Height of top above Ground 1 ft. 3 in.
" " " Sea Level 160 ft.

Time of Observation 8 a.m.

Nearest Railway Station
Name Branksome
Distance ½ Direction East.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

by Rev James Cross Vicar

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. in.
" " " Sea Level 85 ft.
Time of Observation 9 am
Nearest Railway Station: Name Baileygate; Distance ¼ mile; Direction North

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

INSTRUCTIONS.

The rainfall, recorded if possible at 9h. a.m., should be entered to the day *previous* to that on which it is measured. If the daily record is unavoidably interrupted, the two or three days' accumulation should be bracketed. Days without rain should be marked with a dash —. When the fall is less than ·01in. the water should be thrown away. Notes on Thunderstorms, Halos, and other Meteorological Phenomena of like nature are welcome, and may be inserted on the blank page opposite.

Observers are requested to send their returns as soon as possible after the end of the year to H. Stilwell, Esq., Steepleton Manor, Dorchester.

REGISTER OF RAINFALL IN 1910.

FORM A2.
BRITISH RAINFALL.

Kept at Upwey (Portland Waterworks)

in the County of Dorset 3

by R. Stevenson Henshaw, C.E.

RAIN GAUGE
Pattern 8" Negretti & Zambra.
Diameter of top 8 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 289·57 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Wishing Well Halte Upwey.
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

13 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Worgate Hill Wareham

in the County of Dorset 3

by William Sargent

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 1 in.
" " " Sea Level 108 ft.

Time of Observation 9. a.m

Nearest Railway Station
Name Wareham
Distance 1½ Direction North East

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

13 JAN 1911

Kept at Weymouth

in the County of Dorset

by J. J. Brown

3

Rain Gauge: Pattern Snowdon

Diameter of top 5 in.

Height of top above Ground 1 ft. — in.

" " " Sea Level 22 ft.

Time of Observation 9 AM

Nearest Railway Station: Name Weymouth

Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

INSTRUCTIONS.

The rainfall, recorded if possible at 9h. a.m., should be entered to the day previous to that on which it is measured. If the daily record is unavoidably interrupted the two or three days' accumulation should be bracketed. Days without rain should be marked with a dash (–). When the fall is less than ·01in. the water should be returned to the receiver and a cross (×) entered in the register. The capacity of the receiver should be at least 6 inches. Notes on Thunderstorms, Halos, and other Meteorological Phenomena of like nature, are welcome, and may be inserted on the blank page opposite.

Observers are requested to send their returns as soon as possible after the end of the year to the Honorary Editor of the Proceedings, the Rev. W. Miles Barnes, Monkton Rectory, Dorchester.

Name Wimborne
Distance 5m Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.
